# RISE ETHIOPIA

# R1-B HOUSEHOLD QUESTIONNAIRE

## INTRODUCTION AND CONSENT:

FIELDWORKER: Read the following statement to the index child's primary caregiver.

My name is _____. I am working with the Ethiopian Development Research Institute. We are conducting a survey about education and other topics in schools and households all over Ethiopia. The aim of this survey is to help improve the quality of education in Ethiopia. One of your children, [INDEX CHILD], has been selected for inclusion in the survey at their school. They have been asked to participate in tests to assess their numeracy and literacy skills. Their results will not contribute to their school grades, but will be used to examine the quality of learning at their school. We would like to interview you so we can learn more about their home background.

The questions usually take around 1 – 2 hours. All the answers you give will be confidential and will not be shared with anyone other than members of our survey team. If you are happy to participate in the survey, we will provide compensation for your time, but the aim of the survey is to collect information to inform policy and improve education – you will not directly benefit from participating. You do not have to participate in the survey, but we hope that you agree to participate since your views are important. If I ask you any questions that you don't want to answer, just let me know and I will go onto the next question, or you can stop the interview.

Are you happy to participate? Are you happy for your child's test results to be used in our survey?

## INFORMATION FOR FIELDWORKER:

A household is defined as a person or group of related and unrelated persons who live together in the same dwelling unit(s) or in connected premises, who acknowledge one adult member as head of the household. This adult must have primary responsibility for managing resources for all dwelling units or connected premises.

A household member is defined as a person who usually lives in the household, i.e. for 6 or more months of the year.

The index child's primary caregiver is defined as the person who is responsible for the day-to-day care of the index child.
