GRADE 4 MATHS TEACHER KNOWLEDGE QUESTIONNAIRE

R2-E

[ENGLISH VERSION]

0.1	School ID	[__ __ __ __]
0.2	Teacher ID From the TEACHER ROSTER.	[T M __ __]
0.3	If this instrument is not completed, what is the reason? 88 = Completed 01 = Respondent absent 02 = Respondent refused to participate	[__ __]
0.4	Date of completion – use E.C. (dd / mm / yyyy)	__ __ / __ __ / 2013

	Fieldworker	Supervisor
Name		
Code	[__ __ __]	[__ __ __]
Date of check – use E.C. (dd / mm / yyyy)	__ __ / __ __ / 2011	__ __ / __ __ / 2013

INSTRUCTIONS: HOW TO COMPLETE THIS QUESTIONNAIRE

Thank you for participating in the RISE Ethiopia survey.

You have been asked to complete this questionnaire because you are a Maths teacher who teaches one of the Grade 4 classes selected for our survey.

We expect that this questionnaire will take approximately 45 minutes to complete.

All your answers on this questionnaire will be strictly confidential. Your answers will not be shared with anyone else at your school, and it will not be possible to link your answers back to you personally or to your school.

Please read the following instructions, which will help you to record your answers accurately.

This questionnaire includes 20 maths questions that have been completed by a student. The student has recorded their answer for each question by circling either A, B, C or D .

We would like you to mark the student's test.

If the student has answered a question correctly, please place a tick ✓ next to the question:

If the student has answered a question incorrectly, please place a cross ✗ next to the question, **and then** please circle the correct answer option for the question.

Please do not use a calculator for this questionnaire.

1 A teacher works part time teaching 15 lessons per week, while full-time teachers teach 20 lessons.

What percentage of the full-time teacher's hours does she teach?

A. 60%
B. 55%
C. 80%
D. 75%

2 An English teacher teaches extra classes every day from Monday to Friday, each lasting 45 minutes.

How much time does she spend teaching extra classes in total?

A. 4 hours 15 minutes
B. 3 hours 30 minutes
C. 3 hours 45 minutes
D. 4 hours

3 An Educational Board aimed to raise 800,000 Birr to build a new school.

Which sum is closest to the target set?

A. 678,000
B. 120,000
C. 887,000
D. 830,000

4 A class of 30 students comprises: 10 students aged 8, 14 students aged 9, and 6 students aged 10.

Express the total number of students aged 8 and 9 in the class as a fraction in the lowest terms.

A. 4/5
B. 5/4
C. 11/15
D. 17/30

5 A school trip is planned for 57 students. There must be at least one adult for every 8 students.

What is the minimum number of people on the trip?

A. 7
B. 65
C. 56
D. 62

6 Two organisations aimed to raise 700,000 Birr to fund a new school building. However, they could only raise part of the sum required.

Which of the following sums is closest to 700,000 Birr?

A. 50,000 + 500,000 Birr
B. 100,000 + 60,000 Birr
C. 200,000 + 400,000 Birr
D. 300,000 + 350,000 Birr

7 For a practical task, a teacher needs 25ml of liquid for each student. There are 28 students in her class.

How many litres of liquid are needed?

A. 0.07
B. 700
C. 0.7
D. 7

8 30 students in a class took part in a sponsored run to raise money for charity. The students were expected to run for an average of 10 minutes each. 0.55 Birr will be raised for each minute run.

How much would the class expect to raise for charity?

A. 16.5 Birr
B. 165 Birr
C. 1.65 Birr
D. 1650 Birr

9 A local NGO raised 440,000 Birr to fund a number of scholarships. 260 students applied for the scholarship.

If a scholarship is assigned equally to all of them, how much will each student receive?

A. 2,000 Birr
B. 1,692.308 Birr
C. 1,792.308 Birr
D. 1,492.400 Birr

10 Inflation means the price of school uniforms is rising. Last year one uniform cost 150 Birr. This year prices are 40% higher.

What is the new price?

A. 400 Birr
B. 210 Birr
C. 240 Birr
D. 300 Birr

11 Four students, Bekele, Teg, Assefa and Nardos, each try to solve the following problem:

"The total weight of six pineapples is 3kg. What is the weight in grams of one pineapple, on average?"

Only one student solved the problem correctly. Which student provided the right answer?

A. Bekele: 500g

B. Teg: 0.5g

C. Assefa: 600g

D. Nardos: 50g

12 Yechi has to carry 5 litres of water home, but along the way she lost 200ml of water.

How much water did Yechi actually carry home?

A. 480ml

B. 4800ml

C. 48ml

D. 4.8ml

13 The morning session at a school began at 3:25. There were three lessons of 50 minutes each, and one break of 20 minutes.

At what time did the morning session end?

A. 6:15

B. 5:55

C. 6:05

D. 7:15

14 A school has four classes. The first class has 40 students, the second class has 30 students, the third class has 35 students, and the fourth class has 15 students.

What is the average number of students per class?

A. 30

B. 40

C. 22

D. 19

15 A school wants to purchase 500m of cloth for school uniforms. If 3m of cloth costs 60 Birr, what will the total cost of the cloth be?

A. 1000 Birr

B. 10,000 Birr

C. 100,000 Birr

D. 100 Birr

16 There are 45 students in the class, of which 60% are boys.

What is the number of girls in the class? Present your answer as a fraction of the total number of students.

A. 1/15 **B.** 3/15

C. 27/15 **D.** 2/5

17 A school raised some money to finance school expenses, and conducts a survey of teachers to understand in which areas they would like the money to be spent. Teachers listed four areas: 3/20 teachers would like new school books; 1/4 would like a new fence for the garden; 1/5 would like new desks.

If the total number of teachers is 40, how many teachers would like new school uniforms?

A. 24 **B.** 16

C. 8 **D.** 10

18 Meseret marched 3m East and 6m North.

How far is she from her starting point?

A. 7.71m **B.** 15m

C. 34m **D.** 6.71m

19 Nardos has 500 Birr at the beginning of the summer. He needs to have at least 200 Birr at the end of the summer. Each week he takes 25 Birr for food, transport and other expenses.

For how many weeks can Nardos take the money from his savings?

A. 12 weeks **B.** 10 weeks

C. 14 weeks **D.** 20 weeks

20 Musa needs to know the area and perimeter of his field, whose shape is a trapezium with legs 40m and 50m, parallel sides 90m and 120m, and height 40m.

What are the perimeter and area of Musa's field?

A. 300m and 4200m^2 **B.** 300m and 8400m^2

C. 290m and 8400m^2 **D.** 300m^2 and 8400m^2
