About Young Lives

Young Lives is an international study of poverty and inequality, following the lives of 12,000 children in four countries (Ethiopia, India, Peru and Vietnam) since 2001. **www.younglives.org.uk**

Young Lives is funded by UK aid from the UK Government.

The views expressed are those of the author(s). They are not necessarily those of or endorsed by, Young Lives, the University of Oxford, the UK Foreign, Commonwealth & Development Office or other funders.

Summary

Young Lives is a longitudinal study of poverty and inequality that has been following the lives of 12,000 children in Ethiopia, India (the states of Andhra Pradesh and Telangana), Peru and Vietnam since 2001[1]. The study follows two cohorts—the Younger Cohort and the Older Cohort—as they transition from childhood into adulthood.

The Young Lives Rounds 1–7 Data Inventory gives an overview of all publicly available Young Lives data, accessible via the UK Data Service (doi: https://doi. org/10.5255/UKDASeries-2000060). While the Data Inventory offers a broad synthesis of the available data, more granular, survey-specific information can be found in the relevant questionnaires, available here: https://www.younglives.org.uk/household-and-child-survey.

Acknowledgements

This Data Inventory was prepared by Joanna Mihaylova, Kauser Mohsini, Juliana Quigua Chinchilla, Tanima Tanima and Amanda Woodman Deza. Thanks to Penny Rudling for copyediting and overseeing the publication process.

We would particularly like to thank the Young Lives participants and their families for generously giving us their time and cooperation and to our fieldwork teams for their dedication and expertise.

Special thanks to the UK's Foreign, Commonwealth & Development Office (FCDO) for funding Young Lives at Work, as well as the production of this brief. We also thank the Wellcome Trust and the Old Dart Foundation for co-funding this research.

The views expressed are those of the authors. They are not necessarily those of, or endorsed by, the University of Oxford, Young Lives, the UK Government or other funders.

[1] Data in Vietnam was collected up to Round 6. No data was collected in Round 7 due to changes in governmental procedures governing the international transfer of personal data.

Cognitive Development Assessment (CDA)		●												
Ravens Coloured Progressive Matrices (Raven's CPM) test								●						

Note: ♣ No data was collected in Vietnam in Round 7. ♣♣ Self-reported English test was only administered in India. In Rounds 2 and 3, a translated version of the PPVT was administered in Ethiopia, Vietnam, and India. For children in Peru, a Spanish version of the PPVT (PPVT-R), which had already been adapted for use in Latin America, was administered since Round 2. However, in Rounds 4 and 5, the PPVT in Ethiopia, India, and Vietnam underwent notable changes and was henceforth referred to as the Receptive Vocabulary test (Leon & Singh, 2017). The close test measure a child's level on reading comprehension. From Round 3 to Round 5, the closest-in-age siblings of the Younger Cohort were tested in PPVT or receptive PPVT in Ethiopia, Vietnam, and Peru, while in India the closest-in-age siblings of the Younger Cohort were tested in math. Items varied by round and country, for more information, see Revollo and Scott (2022). In Peru, the closest-in-age sibling is always younger, whereas in all other countries, if the closest-in-age sibling was not younger, the oldest-in-age sibling was interviewed.

1.8 Digital Skills

Type of educational institute if COVID-19 had not happened						●						
Reasons for spending more time in education if COVID-19 had not happened						●						

Note: ♣No data was collected in Vietnam in Round 7. ♣ ♣ In the case of Ethiopia, we asked what participant's education choices and enrolment status would have been, if the COVID-19 and armed conflict had not happened. These questions were asked to those that have not been enrolled after the start of the pandemic and now.

HEALTH & WELL-BEING

Note: ♣No data was collected in Vietnam in Round 7. ♣♣In each round, we collect information on whether a SHOCK has ocurred since MONTH and YEAR of the previous in-person round. In addition, since Round 4, we collect information on which year(s), between rounds, the SHOCK in question occurred. In Round 7, and specific to Ethiopia, we also ask whether this shock occurred as a result of any armed conflict that took place since November 2020. In addition, we ask respondents to specify the most important negative event(s) that affected the economic situation of the household since the previous round, and how much HH income was spent/lost as a result. For more granular information on HH shocks for Rounds 1 to 5, please refer to the following technical note: "A Guide to Young Lives Rounds 1 to 5 Constructed Files": https://www.younglives.org.uk/publications/guide-young-lives-rounds-1-5-constructed-files, and for Rounds 6 and 7 the relevant questionnaire(s).

4.7 Household shocks and coping strategies during COVID-19 *(page 1 of 2)* ♣♣

	2020			2021	
	First call	**Second call**	**Third call**	**Fourth call**	**Fifth call**
HH labour					
HH member lost all, or a considerable part, of source of income (HHM aged 10 or older)	●				
HH member lost job (HHM aged 10 or older)	●	●			
Suspended without payment/ Salary cut (HHM aged 10 or older)	●				
Remote work	●				
Caring responsibilities					
Any HH member that require special care	●				
HH member that had to provide care/ changes post COVID-19	●				
Government support					
Access to social programmes/ government support (country specific)	●				●
Violence					
Domestic violence during lockdown (PE and IN only)		●	●		
Economic changes					
Total HH expenses affected		●			
Total (monthly) income of HH changed compared to how it was before date of COVID-19 outbreak (past month)		●			●
HH shocks, changes, recent life history and coping strategies					
Job loss		●			●
Some HH members not received payment/ full payment since COVID-19 outbreak		●			●
Non-farm business closure		●			●
Less work, less or no clients in a nonfarm family business		●			
Disruption of farming, livestock, fishing activities, and supply chain disruption		●			●
Increase in price of farming/business inputs		●			●
Fall in the price of farming/business output		●			●
Increase in price of major food items consumed		●			●
Illness, injury, or death of income earning member of HH		●			●
Theft/looting of cash and other property		●			
New health expenses		●			●
New expenses: for example expenses required by the employer to continue working: buying a laptop, hire internet, etc.		●			
Locusts (ET only)		●			
Burning down of property by riot/violence (Oromia) (ET only)		●			
Violence/riot related injuries/loss of life (Oromia) (ET only)		●			
Violence related arrest of family members (ET only)		●

Note: ♣No data was collected in Vietnam in Round 7.

Young Lives

A Longitudinal Study of Poverty & Inequality

About Young Lives

Young Lives is an international study of poverty and inequality, following the lives of 12,000 children in four countries (Ethiopia, India, Peru and Vietnam). Young Lives is a collaborative research programme led by the University of Oxford in association with research and policy partners in the four study countries.

Through researching different aspects of children's lives across time, we seek to improve policies and programmes for children and young people.

Young Lives Research and Policy Partners

Ethiopia

- *Policy Studies Institute*
- *Pankhurst Development Research and Consulting plc*

India (Andhra Pradesh and Telangana)

- *Centre for Economic and Social Studies, Hyderabad (CESS)*
- *Sri Padmavati Mahila Visvavidyalam (Women's University), Young Lives India*

Peru

- *Grupo de Análisis para el Desarollo (GRADE)*
- *Instituto de Investigación Nutricional (IIN)*
