Question Q.2 in section 9.1 is an adaption of Cantril, H. (1965). The pattern of human concerns: New Brunswick, N. J. : Rutgers University Press, [1965]. The number of steps was reduced from 11 (0-10) to 9 (1-9).

Questions Q.3 and Q.4 in section 9.2 are based on Spitzer, R. L., Kroenke, K., Williams, J. B., & Lowe, B. (2006). A brief measure for assessing generalized anxiety disorder: the GAD-7. Arch Intern Med, 166(10), 1092-1097. doi:10.1001/archinte.166.10.1092. Questions Q.5 and Q.6 in section 9.2 are based on Kroenke, K., Strine, T. W., Spitzer, R. L., Williams, J. B., Berry, J. T., & Mokdad, A. H. (2009). The PHQ-8 as a measure of current depression in the general population. J Affect Disord, 114(1-3), 163-173. doi:10.1016/j.jad.2008.06.026

Note: The GAD-7 and the PHQ-8 were slightly adapted for use in a phone survey. First, we asked participants whether they were alone in the room and if not, whether they could go to another room and/or make sure their phone speaker was off. Second, for each item in GAD-7 and PHQ-8 we asked whether the symptom had been observed (No, not at all / Yes, even if a little bit), and if so, how often it occurred.
