Questions Q.2 and Q.3 in section 4 are an adaption for phone survey purposes of an original work by Spitzer, R. L., Kroenke, K., Williams, J. B., & Lowe, B. (2006). A brief measure for assessing generalized anxiety disorder: the GAD-7. Arch Intern Med, 166(10), 1092-1097. doi:10.1001/archinte.166.10.1092.

Questions Q.4 and Q.5 in section 4 are an adaption for phone survey purposes of an original work by Kroenke, K., Strine, T. W., Spitzer, R. L., Williams, J. B., Berry, J. T., & Mokdad, A. H. (2009). *Note: The GAD-7 and the PHQ-8 were adapted for use in a phone survey. First, we asked participants whether they were alone in the room and if not, whether they could go to another room and/or make sure their phone speaker was off. Second, for each item in GAD-7 and PHQ-8 we asked whether the symptom had been observed (No, not at all / Yes, even if a little bit), and if so, how often it occurred.*
