F	**[ET]** **SAY:** The next set of questions is about shocks you may have experienced because of armed conflict. Throughout the survey, we will ask you about some of your experiences with conflict, because we know this is something that many young people like you have dealt with in Ethiopia during the past few years. When we talk about armed conflict, we mean any armed conflict between the Ethiopian federal government and regional forces, such as the TPLF/TDF, Fano, or OLA, as well as between regional forces, that happened since November 2020/Tikimit 2013. Sometimes you may find this hard to talk about. Feel free not to answer any question. Just say, "I prefer to go to the next question". **FIELDWORKER:** Please make small adjustments to this definition if necessary to better fit the situation of the respondent. For example, by referring to either TDF or TPLF, or only mentioning some of the regional forces as examples. **SAY:** Have there been any changes or disruption since Tikimit 2013, caused by any armed conflict? **ENUMERATOR:** Prompt for the listed events. **SAY:** For example… **FIELDWORKER:** If needed, please specify that when we talk about conflict, we mean any armed conflict between the Ethiopian federal government and regional forces, such as the TPLF/TDF, Fano, or OLA, as well as between regional forces, that happened since November 2020/Tikimit 2013. 7. TIME-USE (YC and OC)

SAY: For this section, I would like to know how you spent your time on a typical day in the last week (from Monday to Friday, excluding holidays, festivals, etc.).

[ET IN] FIELDWORKER: Using 8 cups labelled with each of the 8 categories of activities. Using the [TIME USE] card, explain to [YL Respondent] what each activity means - remember that items about work (Q.5) and school (Q.6) include travelling times. Now give him/her 24 [IN] pebbles [ET] beans and explain that they represent 24 hours of a typical day. Ask him/her to distribute the 24 [IN] pebbles [ET] beans according to the time spent on each task, starting with sleeping time and then with the activities on which he/she spends most of his time. Make sure all 24 [IN] pebbles [ET] beans are allotted.

[ET, IN] FIELDWORKER: Once [YL Respondent] finished allocating the pebbles, confirm if they represent his/her typical day and allow him/her to reallocate the [IN] pebbles [ET] beans if needed. Finally, record the number of [IN] pebbles [ET] beans allocated to each activity.

SAY: Young people do lots of different types of work and different people value different things about a job. In this section, we are interested in your personal preferences over the type of work you would like to do. There are no right or wrong answers. Imagine that you are looking to find work, and this is the only work you will be doing. In a moment, I'm going to tell you about 2 jobs that a young person in [country] might do. These jobs are exactly the same in every way, apart from the differences I will describe to you. For example, if one job has mostly male workers and one job mostly female workers, the type of work is still the same, unless I tell you differently. Similarly, if one job has fixed days and times of working, and the other job lets you choose the days and time you work, the total number of hours is still the same in both jobs, unless I tell you differently.

SAY: After I have told you about both jobs, I will ask you to score each job from 0 to 10, where **0 is the worst** possible job for you and **10 is the best** possible job for you. Consider all characteristics of each of the jobs when making you decision. Score each job independently between 0 and 10. The two scores don't have to add up to 10. I will then ask you to imagine that you wanted to find a job like this. What is the chance between 0 and 10 that you would find this type of job within one year, where 0 means you are certain that you **could not** get this type of job, 10 means you definitely **would** be able to get a job like this, and 5 means a **half-half** chance. Again, the two scores do not have to add up to 10.

ENUMERATOR: Read the question and describe both jobs to the participant. Then click on the link at the bottom to show them the graphic.
[CAPI: Answers to Q.1 and Q.2 must be 0-10, 77=NK, 79=Refused to answer.]

SAY: I want you to think about each of the two jobs I will describe to you now. If 10 is the best possible job for you, and 0 is the worst possible job for you, think about what score you would give each job?

A	Job B - [pre-filled job characteristic 1]. [pre-filled job characteristic 2]. [pre-filled job characteristic 3]. You would earn [pre-filled job characteristic 4] birr/rupees/soles per month.
B	Job A - [pre-filled job characteristic 1]. [pre-filled job characteristic 2]. [pre-filled job characteristic 3]. You would earn [pre-filled job characteristic 4] birr/rupees/soles per month.

SAY: To help you remember, the characteristics of each job are shown on the tablet.

ENUMERATOR: select "show graphic" and show the tablet to the respondent. When [YL Respondent] has finished looking at the graphic, select "Back to questions" below.

Q.1	**A**	What score would you give job A from 0 to 10?	[__ __] [wtpq1jbar7]
	B	What score would you give job B from 0 to 10?	[__ __] [wtpq1jbbr7]

[CAPI: display] ENUMERATOR: Double-check that the job with the highest score is the job the respondent thinks is better for them. If they score both jobs the same, check that they believe both jobs are *exactly* as good as each other. If they think one is better, suggest they score this job higher. There is no reason the two answers will add up to 10 (although they might).

SAY: Now imagine that you want to get one of these jobs. If 0 is no chance at all, and 10 means you could get the job with certainly, think about the chance that you would be able to get each of these jobs within one year? Here are the job characteristics again, to help you remember.

ENUMERATOR: select "show graphic" and show the tablet to the respondent. When [YL Respondent] has finished looking at the graphic, select "Back to questions" below.

Q.2	**A**	What is the chance between 0 and 10 that you would be able to get job A within one year?	[__ __] [wtpq2jbar7]
	B	What is the chance between 0 and 10 that you would be able to get job B within one year?	[__ __] [wtpq2jbbr7]

[CAPI: display] ENUMERATOR: Verify that the job they give the higher number to is the one they belive they are more likely to get. If they give the same number for both jobs, check that they believe they have an equal chance of getting both jobs. If they say the chance of getting a job is 5 out of 10, also verify that they think there is exactly the same chance of them getting the job in one year, as not getting the job.

SAY: I'm now going to describe 2 new jobs to you. Again, these jobs are exactly the same in every way, apart from the differences I will describe to you. Just as before, I will ask you to score each job out of 10, considering all the characteristics of the job. I will then ask you for the chance between 0 and 10 that you could get this type of job within one year.

Text 1: An accident on the road

In the last five months, there have been many car accidents on the roads. Most cases are due to the carelessness of the driver including disregarding traffic signals or falling asleep while driving. However, [NAME]'s accident happened for very different reasons.

[NAME] was driving his truck on the road. He was going to his parents' house, because they were in poor health. He was accompanied by his wife [WIFE NAME] and two children. The trip was going well until it started raining at 8:00 pm. It was dark. [NAME] reduced his speed to avoid an accident. After the rain stopped, many cattle started to cross the road, but [NAME] could not see them clearly. [NAME] was very nervous, because he didn't want to have an accident and put his family or the animals at risk.

Although [NAME] was very careful while driving, he didn't see a goat that crossed the road. By trying to avoid it, he crashed his vehicle into a mound of sand at 11:38 pm. No one was hurt, but everyone was very scared. It was clear that the authorities needed to improve lighting on the road at night.

Based on the article, answer the following questions by selecting the correct answer on the tablet screen.

1. According to the text, the majority of car accidents are caused by ...]

a. Drivers' carelessness	[_____] [raq1r7
b. Misplaced traffic signals

2. Why was [NAME] travelling to his parents' house?

a. So that his wife and children could visit them.	[_____] [raq2r7]
b. Because he missed them	
c. Because he lived with his parents.	
d. Because they were in poor health.	

3. What made [NAME]'s journey more dangerous?

a. The rain, the dark and the mound of sand [PE: The rain, the fog and the mound of sand]	[_____] [raq3r7]
b. The rain, the dark and the animals that crossed the road [PE: The rain, the fog and the animals that crossed the road]	
c. The dark, the rain, the wind and the animals that crossed the road [PE: The fog, the rain, the wind and the animals that crossed the road]	
d. The animals that crossed the road	

4. Based on the text above, it is likely that:

[Name] killed the goat or other animal crossing the road.	[_____] [raq4r7]
Someone in the car was speaking to [Name] and distracted him before the accident.	
[Name] will not drive under similar conditions in the future.	
[Name] would be given a ticket for poor driving by the police.	

5. What is the main purpose of this news article?

a. To inform people about the dangers caused by animals on the road [PE: To inform people about the accidents caused by animals on the road]	[_____] [raq5r7]
b. To inform people that the authorities need to improve lighting on the road where this accident happened	
c. To encourage people to avoid driving on this road because of poor lighting	
d. To inform people about a tragic car accident that happened because of bad traffic signals [PE: To inform people about a car accident that happened because of bad traffic signals]	

6. Which of the following reasons does the author think provides the strongest reason for street lighting? [PE: Which of the following responses to the accident might the author of this article support?]

a. Installing street-lighting so that cattle can more easily see cars on the road	[_____] [raq6r7]
b. Installing street-lighting to ensure drivers stop at traffic signals [PE: Using street-lighting to reduce fog on the road]	
c. Installing street-lighting to increase visibility for drivers [PE: Increasing visibility for drivers by improving lighting]	
d. Installing street-lighting to reduce careless driving [PE: Adding additional street-lighting in poor weather conditions]	

Now, read the following text carefully
Ocean

Imagine there is a competition in which you are told to give Earth a new name. What would you call it? If you look at the surface of the earth from space, you could call it [Oceana]. This would probably be a good name because around 71% of the earth's surface is covered with water, and most of the water – around 97% - can be found in oceans.

Although every ocean and every sea has a different name, they all form one continuous mass of water. The Atlantic, Indian and Pacific are three major oceans. Other masses of water, such as the Mediterranean Sea, Black Sea and the Arctic Ocean are considered part of the Atlantic Ocean. A sea is a part of an ocean but is almost completely surrounded by land.

The Pacific Ocean is the biggest on Earth. Its surface and volume are greater than the Atlantic Ocean and the Indian Ocean combined. The Pacific is also the deepest, with an average depth of 3,350 meters. Although the Indian Ocean is much smaller than the Atlantic, its average depth is greater.

The ocean, formed by salt water, carries an important role in the water cycle. In this cycle, the sun's rays heat the ocean surface. Heat makes water evaporate and change from its liquid phase to gas. Evaporated water, which is pure, enters the atmosphere as water vapour. The salt
Based on the text, answer the following questions by selecting the correct answer on the tablet screen.

7. What would be the best title for the text above? [PE: What is the previous text about?]

a. Seas and rivers	[_____] [raq7r7]
b. Oceans and the water cycle	
c. The biggest oceans in the world	
d. The effect of the wind and rain	

8. Based on the text, which of these would you say is true?

a. Oceans, rivers and seas are contaminated by rain, hail and water.	[_____] [raq8r7]
b. The surface, depth and volume of oceans is comparable to that of seas.	
c. At night, there is no evaporation of water.	
d. Clouds, rivers and hail are all forms of water, but unrelated to each other.	

9. Why is '[Oceana]' a good new name for Earth?

a. Because it's a nice name	[_____] [raq9r7]
b. Because the Earth is mostly made up of water in the oceans	
c. Because oceans are an important part of the water cycle	
d. Because oceans are a source of water for all living things	

10. According to the text, salt water turns into fresh water when...

a. It falls in the form of rain	[_____] [raq10r7]
b. It filters through the rocks	
c. It cools [PE: water cools]	
d. It evaporates and condenses [PE: water evaporates]	

11. What is a sea and how is it related to an ocean?

a. Seas can be formed by fresh water, which makes them different from an ocean	[_____] [raq11r7]
b. An ocean needs to be at least 3,350 meters deep, while seas are less deep	
c. Seas, like oceans, can contribute to generating fresh water	
d. The Mediterranean and Black seas are part of the Artic Ocean	

12. Which of the following is the most important idea in the previous text?

a. Oceans play a very important role in the water cycle	[_____] [raq12r7]
b. The Atlantic Ocean is bigger than the Indian Ocean	
c. The Pacific Ocean is the deepest on Earth	
d. The Mediterranean Sea and Arctic Ocean are part of the Atlantic Ocean

ALTRUISM (only enable for ET)

SAY: I am now going to ask you a scenario about winning the lottery. The question is about money, so although you are not actually winning real money, I would like you to take it seriously, and answer as if you were winning real money.

Imagine the following situation: you bought a lottery ticket and you have just won. The amount you won is 3,000 birr. This money is yours and you can do with it what you like.

However, when you go to pick up your lottery winnings, the lottery company tells you of three charities. One charity says that it helps all people in Ethiopia, including people from the kebele where you were born, but also all other kebeles in the country. The second charity only helps people in the kebele where you were born specifically, and the third charity only helps people in another kebele outside the region where you were born. The lottery company tells you that, if you want, you can donate some of your lottery earnings to any or all of these charities. However, you do not have to do so - it is perfectly okay if you choose to keep all of your winnings for yourself.

FIELDWORKER: Make sure that the sum of the amounts donated in Q.4, Q.5 and Q.6 is not more than the total lottery winnings of 3,000 birr

Q.4	Considering your current situation, how much (if any) would you donate to the charity which helps all people in Ethiopia? -77=NK -79=Refused to answer	Enter value in currency unit [**CAPI**: only numerical input accepted less than 3,000 birr] -8888=NA [_____] [ET: anychrtyr7]

16.2 RISK PREFERENCES (YC and OC)

SAY: Now I am going to show you some cards, each with a game. The games are about money, so although we are not playing the games with real money, I would like you to take them seriously, and decide which choices you would make if we were playing for real money.

First, I will show you a few examples.

FIELDWORKER: Show respondent **Practice Card 1.**

SAY: Imagine that we flip a coin, which has two sides, heads and tails. If the coin lands on heads, you would receive the amount in the green area. In section A here, that is PE: 20 soles/IN: 100 rupees/ET: 100 birr. If the coin lands on tails, you would receive the amount in the white area. In section A here, that is also PE: 20 soles/IN: 100 rupees/ET: 100 birr. So, in section A here, there is an equal chance that you will get the PE: 20 soles/IN: 100 rupees/ET: 100 birr in the green, or the PE: 20 soles/IN: 100 rupees/ET: 100 birr in the white.

In section B, if the coin lands on heads, you would receive PE: 40 soles/IN: 200 rupees/ET: 200 birr; and if the coin lands on tails, you would also receive PE: 40 soles/IN: 200 rupees/ET: 200 birr. So, in section B, there is an equal chance that you will get the PE: 40 soles/IN: 200 rupees/ET: 200 birr in the green, or the PE: 40 soles/IN: 200 rupees/ET: 200 birr in the white.

FIELDWORKER: Whichever the respondent chooses, ask them to explain. If the respondent chooses A, probe and see if they understand that Section B would definitely mean more money.

SAY: Here is another practice example.

FIELDWORKER: Show respondent **Practice Card 2.**

SAY: In section A, if the coin lands on heads, you would receive PE: 40 soles/IN: 200 rupees/ET: 200 birr; and if the coin lands on tails, you would receive PE: 50 soles/IN: 500 rupees/ET: 500 birr.
In section B, if the coin lands on heads, you would receive PE: 20 soles/IN: 100 rupees/ET: 100 birr; and if the coin lands on tails, you would receive PE: 30 soles/IN: 200 rupees/ET: 200 birr. In this game, which section would you choose?

FIELDWORKER: Whichever the respondent chooses, ask her to explain. If the respondent chooses B, probe and see if she understands that Section A would definitely mean more money.

Q.1	**FIELDWORKER:** Did the respondent get the both practice questions correct on the first try? 00=No 01=Yes 88=NA	[__ __] [risk_check]

SAY: Okay good, it seems like you understand the example games. I will now show you the real game. Again, we are not playing for real money but I would like you to choose as if we were.

FIELDWORKER: Show respondent **Chart 1**.

SAY: In this game, there are now six choices; each one has a green area and a white area. Like the previous examples, the amount you could win depends on your choice, and on whether the coin lands on heads, or tails. Let's start with section A. if the coin lands on heads, you would receive PE: 50 soles/IN: 150 rupees/ET: 150 birr and if the coin lands on tails, you would also receive PE: 50 soles/IN: 150 rupees/ET: 150 birr.

Now let us look at section B. This time, if the coin lands on heads, you would receive PE: 40 soles/IN: 120 rupees/ET: 120 birr. But, if it lands on tails, you would receive PE: 100 soles/IN: 300 rupees/ET: 300 birr. In section C, you would win even more on tails, PE: 150 soles/IN: 450 rupees/ET: 450 birr. But! If it lands on heads, you would get PE: 30 soles/IN: 90 rupees/ET: 90 birr. And so on... to section F, where you would receive PE: 300 soles/IN: 900 rupees/ET: 900 birr if it lands on tails; but, if it lands on heads, you would get nothing.

Although we are not playing for real money, if this game did use real money, which section would you choose?

Q.2	Scenario chosen by the respondent 1. PE: 50 soles / 50 soles; IN: 150 rupees / 150 rupees; ET: 150 birr / 150 birr 2. PE: 40 soles / 100 soles; IN: 120 rupees / 300 rupees; ET: 120 birr / 300 birr 3. PE: 30 soles / 150 soles; IN: 90 rupees / 450 rupees; ET: 90 birr / 450 birr 4. PE: 20 soles / 200 soles; IN: 60 rupees / 600 rupees; ET: 60 birr / 600 birr 5. PE: 10 soles / 250 soles; IN: 30 rupees / 750 rupees; ET: 30 birr / 750 birr 6. PE: 0 soles / 300 soles; IN: 0 rupees / 900 rupees; ET: 0 birr / 900 birr	[__ __] [rskprfr7]

16.3. TIME PREFERENCES (YC and OC)

TIME DISCOUNTING

SAY: Now I am going to ask you a scenario about winning the lottery. The question is about money, so although you are not actually winning the lottery for real money, I would like you to take it seriously, and answer as if you were winning real money.

SAY: Imagine that you bought a lottery ticket and you have just won. The amount you won is PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr. In order to get the full PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr you have to wait 30 days. So, if you wait 30 days, you would get the PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr for sure. However, if, instead, you are willing to accept less than PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr, you could get the lower amount of money today.

[**For ET only**: Here is an example using a different lottery win of 6000 birr. I might be just as happy to get 5500 birr today as 6000 birr in 30 days' time. Even though the first amount is smaller, I could have it now and I would not have to wait 30 days. However, I would not be willing to accept 5400 birr today, because that would be too little for me. Even if I would get it right now, I would rather wait 30 days to get the full 6000 birr". The lowest amount I would be willing to accept today so that I would not have to wait 30 days is then 5500 birr.

Now let's go back to the 3,000 birr lottery win we talked about before.]

FIELDWORKER: If the respondent is hesitant, probe with questions of the form: "would you rather accept YYYY soles/rupees/birr today
or wait for the PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr in 30 days?" You must do this at least once.

If the respondent prefers (for example) PE: 500 soles/ IN: 1,500 rupees/ET: 1,500 birr today to PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr in 30 days, lower to PE: 400 soles/ IN: 1,400 rupees/ET: 1,400 birr and ask again. If the participant prefers PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr in 30 days to PE: 500 soles/ IN: 1,500 rupees/ET: 1,500 birr today, increase to PE: 600 soles/ IN: 1,600 rupees/ET: 1,600 birr and ask again until she is indifferent.

Q.1	**FIELDWORKER**: Write down the mimumum amount that the participant would accept today instead of waiting 30 days	Enter value in currency unit [**CAPI**: only numerical input accepted] -8888=NA, -7777=NK, -7999=RTA [_____] [timeprfr7]

FIELDWORKER: Whichever amount the resondent chooses, check that she agrees that she would be *just as happy* receiving the lower amount today or the PE: 1,000 soles/ IN: 3,000 rupees/ET: 3,000 birr in 30 days.

17.1 CONFLICT EXPERIENCES (ET Only, YC and OC)

SAY: Now I would like to know about some of the experiences which you may have had if you have been exposed to any armed conflict. When we talk about armed conflict, we mean any armed conflict between the Ethiopian federal government and regional forces, such as the TPLF/TDF, Fano, or OLA, as well as between regional forces, that happened since November 2020/Tikimit 2013. If you did experience any of these things, I would also like to know when they first happened. Sometimes topics like this one may be hard to talk about. Feel free not to answer any question. 22. HOUSEHOLD GPS

Data collected in this section is not publicly archived to protect the anonymity of our respondents

Q.1	**Enumerator:** Please complete this section after the interview is complete, as it does NOT require [YL Respondent]'s input. We would now like you to collect the GPS coordinates for [YL Respondent]'s household. The GPS coordinates must be collected outside. Please go outside of [YL Respondent]'s house and then click on the "Record Location" button below. This will use your tablets built in GPS-navigation system to store the GPS co-ordinates. If you get a pop-up saying "loading location" please wait a couple of minutes before pressing the "record location" button, as this will improve the accuracy of the GPS coordinates. **PLEASE MAKE SURE THE LOCATION IN YOUR DEVICE IS ON.** [gpsr7latitude] [gpsr7longitude] [gpsr7altitude] [gpsr7accuracy] [gpsprobr7]

Tablet-based Rapid Assessment of Cognitive and Emotional Regulation (RACER) - ET and PE (YC only)

This section is a sub-study. Data collected is not currently available to the public

CAPI: Only enable this section if Section 0.3, Q.2=01 (consent given for RACER). If Section 0.3, Q.2=00, skip to next section. Section is also skipped for those with any visual impairment (Section 13,A=1) or cognitive disability (Section 13,B=1).

FIELDWORKER: Before administering RACER, answer the following question.

Q.A	**ENUMERATOR:** Is there a reason the participant is unable to complete the RACER test? Answer this questions based on the information you have about the participant. If the answer is yes, record the reason and skip this section. 01=Yes (specify) ► Skip this section 00=No	[__ __] [rfsdracer7] [_____] [whyrsnspc]

ID FOR THE PARTICIPANT: The ID for this participant is AREM[prefill with ID list].

FIELDWORKER: When using the tablet with the RACER app, enter the ID you see on the screen here into the Student ID space in the RACER app.

FIELDWORKER: Please administer the RACER tablet application to the YL respondent. Before the respondent views the tutorial, take the time to explain the tasks using printed pictures that mimic what the respondent is about to see on the screen. After you have made sure that the respondent understands the instructions, proceed to the tutorial, practice, and test sections via the RACER tablet application.

FIELDWORKER: After administering RACER, answer the following questions.

20. CORTISOL (YC and OC)

This section is a sub-study. Data collected is not currently available to the public

Q.0.1	**FIELDWORKER**: Has [YL Respondent] agreed to provide us with a small lock of hair? 00=No ► Go to Next Section 01=Yes	[__ __] [cnsntcrt1r7]

20.1 Eligibility

SAY: Thank you very much for consenting to be part of the cortisol study and providing us with a sample of your hair. As I mentioned this is a completely harmless procedure, with no risk involved, and it will take less than 5 minutes. Before proceeding I have to ask you one more question and check if your hairs are long enough.

FIELDWORKER: The next two questions are to confirm that the participant is eligible to participate in the hair sample collection.

Q.0.2	Have you been diagnosed with hypo- or hypercortisolism (for example, Addison's disease or Cushing's syndrome)? 00=No 01=Yes ► Go to Next Section 77=NK / They have not heard of these health conditions	[__ __] [hyprcrtr7]

FIELDWORKER: please follow the protocol, sanitize hands, comb, hair clips, and scissors.

Q.0.3	**[IN, PE]** **FIELDWORKER**: Check if the [YL Respondent]'s hair is at least 3cm long when pulled straight, or 2cm long for coily/kinky hair. If it is obvious no need to check, otherwise please use the comb and a ruler to check the actual length. 00=No ► Go to Next Section 01=Yes	[__ __] [hairlngr7]

Q.0.3	**[ET]** **FIELDWORKER**: Check if the YL respondent's hair is at least 3 cm long when pulled straight, or 2cm long for coily/kinky hair. If it's obvious no need to check, otherwise please use the comb and a ruler to check the actual length. If for other reason you are unable to collect the sample (to much butter on hair, the respondents is unwilling to undo braids etc..) you might need to revisit the participant. In those cases mark option "02" and add in the comment what the reason is 00= No, to short hair ► Go to Next Section 01= Yes, long enough 02= No, cannot take the sample for other reasons Specify: [_____] ► Go to Next Section	[__ __] [ET: hairsmpnr7]

SAY: Ok. It looks like we can go ahead.

Q.1	**FIELDWORKER**: Please register if the participant confirms their participation in the hair sample collection. 00=No ► **FILEDWORK**: Check why [YL Respondent] has changed their mind. Explain again the nature of the study and try to clarify any doubts. If the [YL Respondent] Still refuses then **SAY**: Ok, no problem, I understand.► **CAPI**: Go to Next Section 01=Yes	[__ __] [cnsntcrt2r7]

20.2 Hair Sample Collection

FIELDWORKER: Please follow the instructions reported below to collect the hair sample.
1. Ask the respondent to take a seat, on a chair. Make sure the participant is at ease/relaxed.
2. Prepare container for the hair sample: a piece of aluminium foil or paper envelope. Double-check the pre-filled label that will be attached to the container and fill in any missing or incorrect information (CHILDCODE, sex, first name; date and enumerator ID).
3. Locate the posterior vortex
4. Using the comb, section 1.5x1.5 cm area. For long hair, pin the surrounding hair back and use a small hair tie to help keep the roots aligned. Aim to collect at least 20mg of hair to analyze (in the 3cm closest to the scalp).
5. The scissors should be flat against the scalp to cut the hair sample.
6. Put the sample on the aluminium foil. Use tape (>5 cm long hair) and/or small hair tie (< 5 cm long) to keep the roots aligned. Do not put tape on the 3cm of interest.
7. Fold the aluminium foil around the hair so that no direct sunlight can access the hair. Put the sample in the labeled paper envelope.
8. Each day give your samples to the supervisor who will keep them stored in a container at room temperature in the dark.

Q.2.1	**FIELDWORKER**: Please, mark if the hair sample has been obtained. 00=No 01=Yes ► Go to Q.3.1	[__ __] [hairsmpr7]
Q.2.2	**FIELDWORKER**: Why could the hair sample not be obtained? 01=Participant refused at the last minute 02=Participant moved too much 02=Hair was not long enough 04=Equipment did not work 05=Equipment is missing 06=Other, specify **CAPI**: Once completed, skip to Next Section.
